A Customer Problem

- A customer is asking your help for Automated Video Feedback App for Gym Workouts
 - Business motivation:
 - Failure to perform workouts correctly can lead to poor results, wasting time, and an increased risk of injuries
 - Personal trainers offer expert advice but come at a high cost and may not always be available when needed

Problem Description

- Our goal is to develop a **computer vision application** that allows users to **upload** videos of their **gym workouts** and receive feedback on their performance. Potential feedback examples:
 - Identifying incorrect exercise form
 - Provide a detailed text feedback on specific workout changes to improve
 - Suggesting different exercises for targeted muscle groups
 - Estimating calorie burn based on the observed workout

Your Turn

- Help your team to scope the problem
- Propose some machine learning learnable problems!

“Acquire knowledge and impart it to the people.”

“Seek knowledge from the Cradle to the Grave.”
